

NEHI AT A GLANCE

WHO WE ARE

Member-driven, NEHI represents over 50 organizations from across all healthcare sectors working to advance the adoption of health innovation in diagnostics, therapies, operations, and payment models.

Unbiased, non-profit, and analytic, NEHI explores and solves today's complex problems, leveraging innovations to address unmet needs and improve equitable access to health.

AROUND THE CRITICAL ISSUES OF THE DAY ... WHAT WE DO

- Research issues and convene experts to address our members' concerns by recommending ways to remove barriers to innovation.
- Pressure test our recommendations with a cross-section of stakeholders to enhance feasibility and adoption.
- Publish reports on our findings, disseminate these, advance discussion via webinars, and work with members to pilot solutions.

NEHI'S AREAS OF FOCUS

Within the innovation space, our research agenda focuses on:

- How value-based payment models affect the adoption of innovations
- Ensuring that innovations advance health equity
- Addressing persistent and urgent problems in healthcare, with a current spotlight on mental health

HOW DOES THIS FOCUS TRANSLATE INTO NEHI'S WORK?

NEHI members exchange ideas and perspectives through roundtable conversations, closed-door convenings, white papers, webinars, and other channels or venues on some of healthcare's most challenging topics. We provide a safe environment for candid discussions.

WHAT OUR MEMBERS GAIN

Membership at NEHI connects leaders outside of their own sectors in conversations about difficult issues by emphasizing a common mission. We provide a safe environment for a candid exchange of perspectives that can inform members' business objectives and strategic goals. And, NEHI works with its members to pilot new collaborations. As a member, you can help drive the conversations to influence policy and practices.

NEHI Members
