

NETWORK FOR EXCELLENCE IN HEALTH INNOVATION PRESENTS:

Advancing Integrated Behavioral Health and Primary Care: Persistent Challenges and Potential Solutions

MAY 20, 2021 | 1:30-4:00PM ET

Via Zoom ([Register Here](#))

There is broad interest and significant investment in integrating behavioral and primary care among professional organizations, CMS, payors and providers. Yet, despite over two decades of convincing evidence about its value and cost-effectiveness, adoption of integrated behavioral health care is proceeding slowly. What are the barriers to scaling a solution that appears critical to addressing our nation's behavioral health needs? What are the solutions we can implement today? What is the advocacy we need for tomorrow?

Join us for a discussion among individuals who have been working on integration issues for much of their careers to explore how to build on key areas of agreement to highlight and promote critical first steps.

We invite you to support the Network for Excellence in Health Innovation as we host a discussion on this important topic. For more information about the webinar or sponsorship opportunities, please contact Donna Amrhein, damrhein@nehi-us.org
